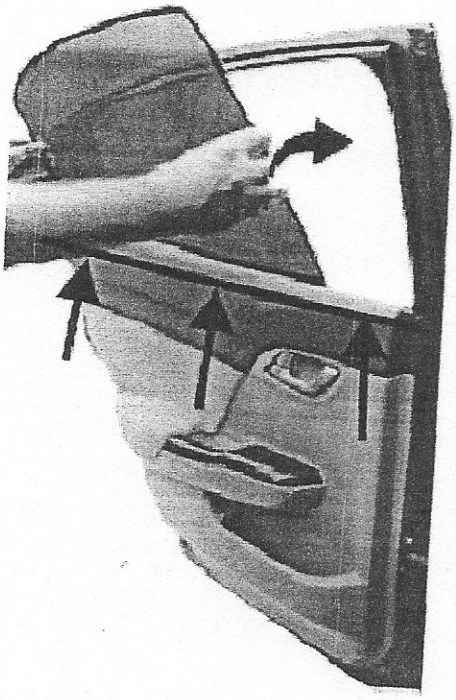
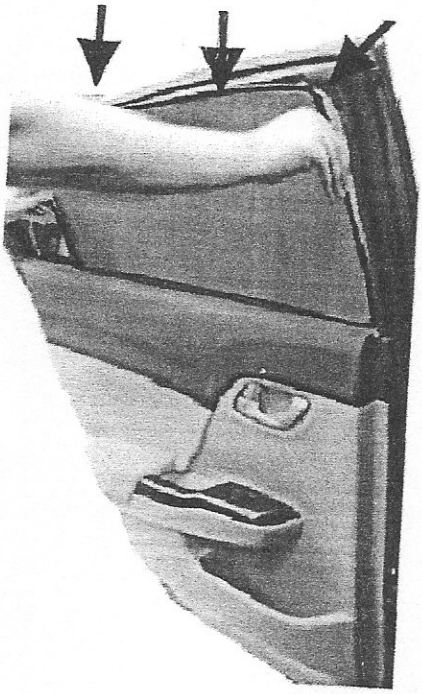
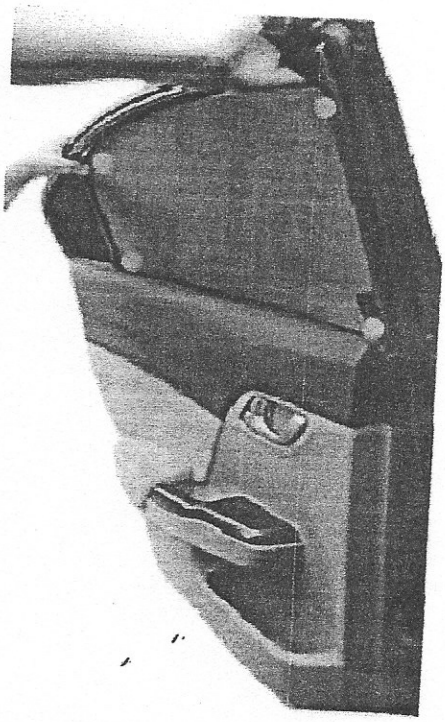
Drive shades



Align **Drive Shades** to the bottom or groove of the car window, make sure to push it inside a bit of the groove (not too much). [In some cases it has to be applied from the upper side first, depending on the car's window.



Push **Drive Shades** top against the car window, [bottom in some cases first] making sure all the corners are covered and there are not any spaces left. If there's a space left, push the shade towards the space and it shall be covered.



Snap it on all the four corners making sure it fits.

NOTE: IN SOME CASES DRIVE SHADES HAVE TO BE APPLIED FROM THE UPPER END FIRST, IT CAN DEPEND ON THE CAR'S WINDOW'S SHAPE, MAKE SURE TO SEE WHICH SIDE TO INSERT FIRST BEFORE APPLYING SO IT'S EASIER FOR YOU TO APPLY THEM AND NOT BEND THEM
